

ISGS Summer School 2016

Berlin - Germany

24 - 27 July 2016

The 5th edition of the
ISGS Summer School

SOL-GEL CHARACTERIZATION TECHNIQUES AND ENERGY-RELATED SOL-GEL MATERIALS

The International Sol-Gel Society presents its 5th Summer School to be held in Berlin from 24th to 27th July 2016. Young researchers and experienced scientists are invited to gather at the Bildungszentrum Erkner for 4 days to attend courses on sol-gel chemistry and advanced characterization techniques.

RICH SCIENTIFIC AND SOCIAL PROGRAM

International experts from both Academia and Industry will cover topics ranging from sol-gel chemistry to advanced characterization techniques and energy-related sol-gel materials during an intensive 3-day program. In addition, the activities scheduled in the evenings will give the attendees the opportunity to network in a friendly environment.

MAIN TOPICS OF THE ISGS SUMMER SCHOOL 2016 ARE:

Fundamentals of sol-gel chemistry

Advanced characterization techniques for sol-gel materials

Energy materials by sol-gel chemistry

The program of the 5th ISGS Summer School will start by the first lecture in the evening of Sunday 24 July and will end after lunch on Wednesday 27 July.

The rich program includes morning and afternoon lectures, open discussion with speakers and evening social events such as welcome reception for networking and knowledge sharing.

REGISTRATION

Online registration on ISGS website: www.isgs.org

Costs all inclusive for 3 nights are:

Academics: 650€ double room / 800€ single room

Industrials: 850€ double room / 1000€ single room

The registration fee includes:

access to all courses and materials, lunches,
coffee-breaks, social events and accommodation.
